TWO BOOKS BY
LESTER F. WARD
Applied Sociology

There is no question that Dr. Ward is the greatest authority on fundamental social science in the world today. Applied Sociology is regarded as his crowning achievement. Its purpose is to point out how the obstacles to human progress may be overcome by the application of the principles of human science.

**Psychic Factors
Of Civilization**

This work is an original contribution to both psychology and sociology. It endeavors to show in a systematic way the workings of mind in social phenomena.

**CARVER'S SOCIOLOGY AND SOCIAL
PROGRESS**

A compilation of the more significant observations made by the moralist, the metaphysician, the philosophic historian, and the man of science, upon the phenomena of society in general, upon the laws of social growth and decay, and upon the problems of social improvement.

GINN & COMPANY, 29 Beacon Street, Boston

**SPECIES AND VARIETIES:
THEIR ORIGIN BY MUTATION**

BY HUGO DE VRIES

Professor of Botany in the University of Amsterdam.

EDITED BY DANIEL TREMBLY MACDOUGAL

Assistant Director of the New York Botanical Garden.

Cloth, gilt top, xviii + 847 pages.

Price, postpaid, \$5.00 (21s)

"Prof. de Vries may well be regarded as the foremost advocate of experimental evolution, the man, moreover, who gave us the mutation theory of organic evolution. The volume before us is a splendid scientific plea for the experimental study of organic life."—*Scientific American*.

"It will be seen that Professor de Vries has made an important contribution to science and thought. It is a masterly work and it is attractive because of the popular style in which the experiments are described and the conclusions stated. Every student of science will welcome it."—*The Scotsman*, Edinburgh.
